CONFERENCE ORGANIZERS INSTITUTES

The International Conference on Integrated Information is supported by the following Institutes:

Emerald Group Publishing Limited
Technological educational Institute of Athens, Greece
University of Peloponnese, Greece
National And Kapodistrian University of Athens, Greece
Mednet Hellas, The Greek Medical Network
2\textsuperscript{nd} AMICUS Workshop

To learn more about I-DAS, including the Book Series, please visit the webpage http://www.i-das.org/
INTEGRATED INFORMATION

International Conference on Integrated Information

Kos, Greece September, 29 – October, 3 2011

EDITORS

Georgios A. Giannakopoulos
Technological Educational Institute of Athens, Greece

Damianos P. Sakas
University of Peloponnese, Greece

All papers have been peer-reviewed

Piraeus, Greece, 2011

Conference Details

Keynote Speaker

SYMPOSIUM ON INFORMATION AND KNOWLEDGE MANAGEMENT

Prof. Christos Skourlas

Towards the Preservation and Availability of Historical Books and Manuscripts: A Case Study

Eleni Galiotou

An Extensive Experimental Study on the Cluster-based Reference set Reduction for Speeding-up the k-nn Classifier

Stefanos Ougiaroglou, Georgios Evangelidis and Dimitris A. Dervos

Exploiting the Search Culture Modulated by the Documentation Retrieval Applications

Nikitas N. Karanikolas and Christos Skourlas

Information and Knowledge Organization: The Case of the TEI of Athens

Anastasios Tsolakidis, Manolis Chalaris and Ioannis Chalaris

Providing Access to Students with Disabilities and Learning Difficulties in Higher Education through a Secure Wireless framework

Catherine Marinagi and Christos Skourlas

Improving Query Efficiency in High Dimensional Point Indexes

Evangelos Outsios and Georgios Evangelidis

Text Segmentation Using Named Entity Recognition and co-Reference Resolution in Greek Texts

Pavlina Fragkou

KINISIS, a Graphical XQuery Language

Euclid Keramopoulos, Achilleas Pliakas, Konstantinos Tsekos and Ignatios Deligiannis

Dimensionality Curse, Concentration Phenomenon and the KDB-tree

Nikolaos Kouiroukidis and Georgios Evangelidis
Applying Balanced Scorecard Strategic Management in Higher Education  
Manolis Chalaris, Anastasios Tsolakidis and Ioannis Chalaris

A Web Portal Model for NGOs’ Knowledge Management  
Zuhal Tanrikulu

The Digital Archives System and Application Optimized for the Tradition Knowledge Archives  

A Semi-automatic Emerging Technology Trend Classifier Using SCOPUS and PATSTAT  
Seonho Kim, Woondong Yeo, Byong-Youl Coh, Waqas Rasheed, Jaewoo Kang

Presenting a Framework for Knowledge Management within a Web Enabled Living Lab  
Lizette de Jager and Albertus AK Buitendag and Potjie (JS) van der Walt

4TH SYMPOSIUM ON BUSINESS AND MANAGEMENT AND DYNAMIC SIMULATION MODELS SUPPORTING MANAGEMENT STRATEGIES  
Dr. Damianos Sakas

Evangelia N. Markaki, Damianios P. Sakas and Theodore Chadjipantelis

Free Software – Open Source Software. A Powerful Tool for Developing Creativity in the Hands of the Student  
Nasiopoulos K. Dimitrios, Damianos P. Sakas, Konstantinos Masselos

Open Source Web Applications. How it Spread Through the Internet and their Contribution to Education.  
Nasiopoulos K. Dimitrios, Damianos P. Sakas, Konstantinos Masselos

Culture in Modern Times in the Frame of Luhmann’s System Theory  
Anastasia J. Chournazidis

Managing Scientific Journals: A Cultural Viewpoint  
Marina C. Terzi, Damianos P. Sakas, and Ioannis Seimenis

A Conceptual Framework for Analyzing Knowledge-based Entrepreneurship  
Nikos S. Kanellos
SESSION ON INFORMATION HISTORY: PERSPECTIVES, METHODS AND CURRENT TOPICS

Prof. Laszlo Karvalics

Emerging Research Fields in Information History

Laszlo Z. Karvalics

Information Management through Elementary Data Clusters: New Observations on Pridianum-Type Roman Statistical Documents

Gergő Gellérfi

Information and Secrecy on the Silk Road. Methods of Encryption of Legal Documents in Inner Asia (3th-4th century)

Szabolcs Felföldi

The Role of Information and Disinformation in the Establishment of the Mongolian Empire: A Re-examination of the 13th century Mongolian History from the Viewpoint of Information History

Márton Gergő Vér

Early Warning Systems and the Hospitallers in the Eastern Mediterranean

Zsolt Hunyadi

Information Management as Establishment Dutch Navigational Knowledge on Japan, 1608-1641

Gabor Szommer

Files Everywhere - Register and Training of Men for Military and Civil Purpose in Prussia in the early 18th century

Marton Holczer

SYMPOSIUM ON INTEGRATED INFORMATION: THEORY, POLICIES, TOOLS

Prof. Georgios Giannakopoulos

Approaching Information as an Integrated Field: Educating Information Professionals

Georgios Giannakopoulos, Daphne Kyriaki Manesi and Sryridon Zervos

Special Libraries as Knowledge Management Centers

Eva Semertzaki

Digital Libraries' Developers and their Suitability: A Case Study

Maria Monopoli

Aims and Scope of the Conference

The International Conference on Integrated Information 2011 took place in Kos Island, Greece, between September 29 and October 3, 2011. IC-ININFO is an international interdisciplinary conference covering research and development in the field of information management and integration.

The conference aims at creating a forum for further discussion for an Integrated Information Field incorporating a series of issues and/or related organizations that manage information in their everyday operations. Therefore, the call for papers is addressed to scholars and/or professionals of the fields of Library and Archives Science (including digital libraries and electronic archives), Museum and Gallery Studies, Information Science, Documentation, Information Management, Records Management, Knowledge Management, Data management and Copyright experts the latter with an emphasis on Electronic Publications. Furthermore, papers focusing on issues of Cultural Heritage Management and Conservation Management are also be welcomed along with papers regarding the Management of Nonprofit Organizations such as libraries, archives and museums.

One of the primary objectives of the IC-ININFO will be the investigation of information-based managerial change in organizations. Driven by the fast-paced advances in the Information field, this change is characterized in terms of its impact on organizations that manage information in their everyday operations.

Grouping emerging technologies in the Information field together in a close examination of practices, problems and trends, IC-ININFO and its emphases on integration and management will present the state of the art in the field. Addressed jointly to the academic and practitioner, it will provide a forum for a number of perspectives based on either theoretical analyses or empirical case studies that will foster dialogue and exchange of ideas.

Topics of general Interest

Symposia

The Conference offered a number of sessions under its patronage, providing a concise overview of the most current issues and hands-on experience in information-related fields.

- Symposium on Integrated information: Theory, Policies, Tools
- 4th Symposium on Business and Management and Dynamic Simulation Models supporting management strategies
• Session on Open Access Repositories: Self-archiving, Metadata, Content policies, Usage
• Session on Evidence-Based Information in Clinical Practice
• Session on Business Management and Communication Strategies supporting Decision Making Process in Tourism Sector
• Session on Electronic Publishing: A Developing Landscape
• Session on Information and Knowledge Management
• Session on Information Content Preservation as Outcome of Conservation of Cultural Heritage: Ethics, Methodology and Tools
• Session on Advances Information for Strategic Management
• Session on Information History: Perspectives, Methods and Current Topics
• Session on Divergence and Convergence: Information Work in Digital Cultural Memory Institutions
• Session on Contemporary issues in Management: Organisational Behaviour, Information Technology, Education & Hospital leadership.

The wide range of aspects that the sessions covered, highlighted future trends in the Information Science.

**Paper Peer Review**

More than 300 papers had been submitted for consideration in IC-ININFO 2011. From them, 91 were selected for presentation, after peer review in a double blind review process. The accepted papers were presented at IC-ININFO 2011.

**Thanks**

We would like to thank all members that participated in any way in the IC-ININFO 2011 Conference and especially:

• The famous publishing house Emerald for its communication sponsorship.
• The co-organizing Universities and Institutes for their support and development of a high-quality Conference scientific level and profile.
• The members of the Scientific Committee that honored the Conference with their presence and provided a significant contribution to the review of papers as well as for their indications for the improvement of the Conference.
• All members of the Organizing Committee for their help, support and spirit participation before, during and after the Conference.
• The Session Organizers for their willing to organize sessions of high importance and for their editorial work, contributing in the development of valued services to the Conference.
• PhDc Marina Terzi for her excellent editorial work, contributing in the production of the Conference proceedings.

Spiros Zervos, Technological Educational Institute of Athens
Susan Myburgh, University of South Australia
Theodoros Pitsios, University of Athens, Faculty of Medicine

Organizing Committee
Alexandros Koulouris (Chair), Technological Educational Institute of Athens
Christos Christopoulos, SCEV Scientific Events Ltd
Marina Terzi, University of the Aegean, Greece
Evangelia Markaki, Aristotle University of Thessaloniki
Assimina Kaniari, Athens School of Fine Arts
Evangelia Lappa, General Hospital Attikis K.A.T.
Dimitris Kouis, Greek Ministry of Education, Lifelong Learning and Religious Affairs
Dionysis Kokkinos, National Technical University of Athens
KEYNOTE SPEAKER

Professor Amanda Spink

Professor Amanda Spink has published over 340 scholarly journal articles, refereed conference papers and book chapters, and 6 books. Many of her journal articles are published in the Journal of the American Society for Information Science and Technology, Information Processing and Management, and the Journal of Documentation. She is Editor of the Emerald journal Aslib Proceedings. Amanda’s research has been published at many conferences including ASIST, IEEE ITCC, CAIS, Internet Computing, ACM SIGIR, and ISIC Conferences. Her recent books include Information Behavior: An Evolutionary Instinct and Web Search: Multidisciplinary Perspectives, both published by Springer. Amanda’s research focuses on theoretical and empirical studies of information behavior, including the evolutionary and developmental foundations. The National Science Foundation, the American Library Association, Andrew R. Mellon Foundation, Amazon.com, Vivisimo. Com, Infospace.com, NEC, IBM, Excite.com, AlltheWeb.com, AltaVista.com, FAST, and Lockheed Martin have sponsored her research. In 2008 Professor Spink had the second highest H-index citation score in her field from 1998 to 2008 [Norris, M. (2008)]. Ranking Fellow Scholars and their H-Index: Preliminary Survey Results. Loughborough University, Dept of Information Science Report].
Applying Balanced Scorecard Strategic Management in Higher Education

Manolis Chalaris, Anastasios Tsolakidis and Ioannis Chalaris

Technological Education Institute of Athens, Quality Assurance Service, Ag.Spyridonos St., 122 10 Egaleo, Greece
Email: manoshlr(at)teiath.gr, atsolakid(at)teiath.gr, txalaris(at)teiath.gr

Abstract: The functional efficiency of an institution of higher education depends on the size of the available resources and their efficient use, which is expressed using corresponding indicators e.g. the duration of study. Therefore, there is a need of using new and intelligent models and tools to control and evaluate the educational work. Such models give an emphasis in the processes of developing criteria, techniques, and indicators, and facilitate measurement and performance’s investigation. Recent research showed that Balanced Scorecard gained preferences of the administration of Educational Institutions. This paper presents a discussion of basic elements in a balanced target setting in the area of Higher Education.

Keywords: Higher Education Institution; Balanced scorecard; Strategic management; Quality criteria; KPI, Quality assurance; Quality strategic Map; ADOscore;

I. INTRODUCTION

In today’s world, where knowledge and quality are considered as critical factors in the global economy, Higher Education Institutions (HEI) as knowledge centers and human resource developers play a crucial role. Strategic planning and management enables the Institutions to increase the adaptability with the environment and improve their performance. So, a well-informed strategic management will increase the overall quality of the services provided in the Institutions and Balanced Scorecard (BSC) can be considered as an appropriate strategic management tool for this purpose. In this direction, the decision makers and administrators will be able to organize the internal knowledge in order to support the mission of the institute, to control the outcome services and to design the outcome knowledge due to the needs of the society.

In our paper we describe how the application of the BSC methodology will enhance the quality in HEI and we present a case study regarding TEI of Athens (TEI-A). The paper is organized as follows: In the section II we present how the BSC strategic management enhances the quality in higher Educational Institutes. Section three presents the implementation of the BSC methodology to the TEI of Athens and finally the paper ends with a conclusion.

II. BSC STRATEGIC MANAGEMENT ENHANCE THE QUALITY IN HEI

The quality in a HEI can only be enhanced through a transparent, thorough and integrated evaluation, whose outcomes will be properly assessed and used by the administration of the institute. For the evaluation processes of HEIs, International/National Quality Assurance Agencies have set quality criteria that are correlated with specific indicators that measure the performance in all sectors of the education. Those indicators are called Key Performance Indicators (KPI) 0.

The Hellenic Quality Assurance Agency [2], which is responsible for the accreditation and evaluation of the Greek HEI, has suggested the following sectors for the classification of the quality criteria:

- Educational Program
- Learning
- Research
- Relationships with Social and Cultural events, with industry and Production
- Academic development strategy
- Administrative services and infrastructures
  - (administrative services, student concern, transparency in the management of economic resources, etc.)

The Academic Evaluation is a difficult and complex task but also very important and difficult is the monitoring and utilization of the outcome of the evaluation processes. For this purpose, it is necessary for a HEI to employ strategic management methodologies and models that will facilitate measurement and performance’s investigation.

A. Strategic Management in HEI

Strategic management is a matter of mapping the route between the perceived present situation and the desired future situation. Well – formulated institutional policies that enhance the coordination and effective implementation of programs, projects and plans can support the administration taking the appropriate decisions for the educational development. Through strategic management, the vision, goals, tactics of the institute and strategies which fulfill its needs, will be integrated into a unified whole 0.

For the successful implementation of the goals set by the institute, appropriate tools must be determined and used. This paper is concerned with the BSC tool as a strategic management tool that supports linking strategy with operational initiatives.

B. Balanced Scorecard

Kaplan and Norton (1992) introduced balanced scorecard as a performance measurement tool for the first time. Till now many changes have been made to the physical design, application and the design processes used to implement the tool, that have enhanced the utility of balanced scorecard as a strategic management tool [53].
The typical BSC framework includes the following four perspectives:

- **Financial**: encourages the identification of a few relevant high-level financial measures. In particular, designers are encouraged to choose measures that help in the formulation of an answer to the question "How do we see stakeholders?"
- **Customer**: encourages the identification of measures that answer the question "How do customers see us?"
- **Internal Business Processes**: encourages the identification of measures that answer the question "What must we excel at?"
- **Learning and Growth**: encourages the identification of measures that answer the question "Can we continue to improve and create value?"

The finale purpose of BSC is to support managers by providing them all the factors for aligning the performance of the organisation with its strategy.

**C. Applying BSC in HEI**

The adaptation and application of BSC in an organisation has been described extensively. On the other hand, very little research has been conducted for its adaptation and application in the education context. When a higher education institute wants to apply BSC, it should emphasize academic measures than in financial performance.

Thus, we considered as necessary to adapt the four typical perspectives of the BSC to those presented in the following figure (Figure 1). In this approach, the “financial perspective” is replaced by the “teaching and research work perspective” which refers to the highest possible quality of the supplied teaching and research work. The “customer perspective” is replaced by the “students and partners perspective” since they are considered as customers of the HEIs. The “internal processes perspectives” remains the same, while the fourth perspective “learning perspective” is replaced by the “human and financial resources perspective”. This perspective refers to input and infrastructure elements of the scientific process of the institution.

**D. The impact in the Quality Assurance Processes**

Quality Assurance (QA) in a HEI refers to all processes, infrastructure and personnel that are used in order to improve the quality of the education.

For the better description of the quality assurance processes, we can use the quality strategic map that shows the influence of the external factor to the procedures of a HEI and also the interactions between the management processes and the internal processes.

Figure 2 presents the quality strategic map, which is proposed in a study by Kettunen & Kantola, where there is a linked series of objectives that are located in the four perspectives of the BSC framework and also includes a set of cause and effect relationships among the objectives.

By adopting this suggestion, a HEI, after defining the KPIs that are related to the quality criteria, can define its strategy based on the outcomes of the application of BSC, which will present if the objectives set have been achieved. In particular, the management of the Quality Assurance Unit of an institute can monitor all performance indicators in order to support the administration of the institute in taking decision for the improvement of the quality of the educational and operational processes and in setting its strategic objectives.

For this purpose, a tool for supporting the BSC methodology is considered as necessary for the better monitoring, measurement, and dynamic controlling of the institute performance. As such a tool, we suggest ADOscore that offers a unique Management Portal to display information and aid decision making using actual company strategy and performance results. Web-based management reports automatically generated by ADOscore and intuitive Controlling Cockpits with charts, trends, and traffic lights, deliver the right information at the right time (see Figure 3).

With the usage of this tool each user – role of the institute can select the sector he is interested in and continuously monitor the performance of the indicators of the evaluated sector. In this direction, the manager of
the Quality Assurance Unit of the institute can observe all performance indicators in order to support the administration of the institute taking decision for the improvement of the quality of the educational and operational processes and in setting its strategic objectives.

Further, one of the most important steps was to present the quality strategic map which shows the interactions between the strategic objectives as well as the quality criteria related to each one (see Figure 5).

III. The Case Study of TEI of Athens

In TEI of Athens, and specifically in the department of Informatics, a first attempt has been conducted to implement the BSC technic with the support of the ADOscore tool.

First it has been defined the vision and the strategic target of the department, and thus the institution’s. Then, and for each of the four adapted perspectives of the BSC, strategic objectives have been defined setting in addition the success factors that have to be achieved (see Figure 4).

What was missing for the accomplishment of this attempt was the definition of the specific indicators that are related to the quality criteria. In other words, the indicators could only be described theoretically without relating any measurable values. So, there was not possible to monitor, through the intuitive Controlling Cocksits of ADOscore tool, the existing situation and the grade of achieving the strategic objectives and the performance of the strategy in total.

IV. CONCLUSIONS

This paper represents how the application of the BSC methodology will enhance the quality in HEI and presents also an attempt to apply the balanced scorecard methodology in TEI of Athens (TEI-A).

This first attempt in TEI-A, showed that BSC is indeed an appropriate strategic management tool that will enhance the quality of a HEI. Its application will support the administration entities to observe all performance indicators and suggest solutions for the improvement of the quality of the educational and
operational processes especially when this application is supported be a tool for the better monitoring, measurement and dynamic controlling of the institute performance, like ADOScore.

As a further step concerning the implementation of BSC in TEI-A, we will try, within the project “MODIP of TEI of Athens”, to set the specific and measurable indicators and relate them with the quality criteria and strategic objectives of the institute. As basis for this attempt will be the evaluation model proposed by the Hellenic Quality Assurance Agency.

ACKNOWLEDGEMENT

This paper is written within the project “MODIP of TEI of Athens” – NRSF 2007-2013.
