PROCESSING AND
MANAGEMENT

CONFERENCE ORGANIZERS INSTITUTES

The International Conference on Integrated Information is supported by the following Institutes:

Emerald Group Publishing Limited
Technological educational Institute of Athens, Greece
University of Peloponnese, Greece
National And Kapodistrian University of Athens, Greece
Mednet Hellas, The Greek Medical Network
2nd AMICUS Workshop

To learn more about I-DAS, including the Book Series, please visit the webpage

CONTENTS

PREFACE: Proceedings of the International Conference on Integrated Information (IC-INFO 2011)	1
Georgios A. Giannakopoulos, Damianos P. Sakas	
Conference Details	3
Keynote Speaker	5
SYMPOSIUM ON INFORMATION AND KNOWLEDGE MANAGEMENT	6
Prof. Christos Skourlas	
Towards the Preservation and Availability of Historical Books and Manuscripts: A Case Study	8
Eleni Galiotou	
An Extensive Experimental Study on the Cluster-based Reference set Reduction for Speeding-up the k-nn Classifier	12
Stefanos Ougiaroglou, Georgios Evangelidis and Dimitris A. Dervos	
Exploiting the Search Culture Modulated by the Documentation Retrieval Applications	16
Nikitas N. Karanikolas and Christos Skourlas	
Information and Knowledge Organization: The Case of the TEI of Athens	22
Anastasios Tsolakidis, Manolis Chalaris and Ioannis Chalaris	
Providing Access to Students with Disabilities and Learning Difficulties in Higher Education through a Secure Wireless framework	26
Catherine Marinagi and Christos Skourlas	
Improving Query Efficiency in High Dimensional Point Indexes	30
Evangelos Outsios and Georgios Evangelidis	
Text Segmentation Using Named Entity Recognition and co-Reference Resolution in Greek Texts	34
Pavlina Fragkou	
KINISIS, a Graphical XQuery Language	42
Euclid Keramopoulos, Achilleas Pliakas, Konstantinos Tsekos and Ignatios Deligiannis	
Dimensionality Curse, Concentration Phenomenon and the KDB-tree	46
Nikolaos Kouiroukidis and Georgios Evangelidi	

Applying Balanced Scorecard Strategic Management in Higher Education	50
Manolis Chalaris, Anastasios Tsolakidis and Ioannis Chalaris	
A Web Portal Model for NGOs' Knowledge Management	54
Zuhal Tanrikulu	
The Digital Archives System and Application Optimized for the Tradition Knowledge Archives	58
Jeon Hong. Chan, In Deok. Hwang, Jae Hak. Park, Hyeok. Sim, U won. Gwon and Soon Cheol. Park	
A Semi-automatic Emerging Technology Trend Classifier Using SCOPUS and PATSTAT	62
Seonho Kim, Woondong Yeo, Byong-Youl Coh, Waqas Rasheed, Jaewoo Kang	
Presenting a Framework for Knowledge Management within a Web Enabled Living Lab	66
Lizette de Jager and Albertus AK Buitendag and Potjie (JS) van der Walt	
4TH SYMPOSIUM ON BUSINESS AND MANAGEMENT AND DYNAMIC SIMULATION MODELS SUPPORTING MANAGEMENT STRATEGIES	71
Dr. Damianos Sakas	
New Political Communication Practices: No Budget Events Management. The New Challenge	73
Evangelia N. Markaki, Damianios P. Sakas and Theodore Chadjipantelis	
Free Software – Open Source Software. A Powerful Tool for Developing Creativity in the Hands of the Student	78
Nasiopoulos K. Dimitrios, Damianos P. Sakas, Konstantinos Masselos	
Open Source Web Applications. How it Spread Through the Internet and their Contribution to Education.	82
Nasiopoulos K. Dimitrios, Damianos P. Sakas, Konstantinos Masselos	
Culture in Modern Times in the Frame of Luhmann's System Theory	85
Anastasia J. Chournazidis	
Managing Scientific Journals: A Cultural Viewpoint	87
Marina C. Terzi, Damianos P. Sakas, and Ioannis Seimenis	
A Conceptual Framework for Analyzing Knowledge-based Entrepreneurship	92
Nikos S. Kanellos	

SESSION ON INFORMATION HISTORY: PERSPECTIVES, METHODS AND CURRENT TOPICS	96
Prof. Laszlo Karvalics	
Emerging Research Fields in Information History	98
Laszlo Z. Karvalics	
Information Management through Elementary Data Clusters: New Observations on Pridianum-Type Roman Statistical Documents	102
Gergő Gellérfi	
Information and Secrecy on the Silk Road. Methods of Encryption of Legal Documents in Inner Asia (3th-4th century)	106
Szabolcs Felföldi	
The Role of Information and Disinformation in the Establishment of the Mongolian Empire: A Re-examination of the 13th century Mongolian History from the Viewpoint of Information History	110
Márton Gergő Vér	
Early Warning Systems and the Hospitallers in the Eastern Mediterranean	114
Zsolt Hunyadi	
Information Management as Establishment Dutch Navigational Knowledge on Japan, 1608-1641	118
Gabor Szommer	
Files Everywhere - Register and Training of Men for Military and Civil Purpose in Prussia in the early 18th century	123
Marton Holczer	
SYMPOSIUM ON INTEGRATED INFORMATION: THEORY, POLICIES, TOOLS	126
Prof. Georgios Giannakopoulos	
Approaching Information as an Integrated Field: Educating Information Professionals	128
Georgios Giannakopoulos, Daphne Kyriaki Manesi and Stryidon Zervos	
Special Libraries as Knowledge Management Centers	132
Eva Semertzaki	
Digital Libraries' Developers and their Suitability: A Case Study	136
Maria Monopoli	

A Preliminary Study for the Creation of a Greek Citation index in the Humanities and the Social Sciences (GCI – H&SS)	140
Daphne Kyriaki-Manessi and Evi Sachini	
Archiving as an Information Science. Evidence from a Survey Carried out on a Sample of Greek Students	144
Georgios Giannakopoulos and Ioannis Koumantakis	
Transition Process of E-records Management and Archiving System in Universities: Ankara University	147
S. Özlem Bayram and Fahrettin Ozdemirci	
Government Information: Access and Greece's Efforts for Access	150
Aikaterini Yiannoukakou	
School Archives and their Potentials in Teaching: Aspects of Greek Reality	156
Sonia Geladaki and Panagiota Papadimitriou	
Research on School Libraries in Greece and Suggestions on its Further Development	160
Georgios D. Bikos	
Building Digital Collections for Archeological Sites: Metadata Requirements and CIDOC CRM Extension	164
Georgios S. Gkrous and Mara Nikolaidou	
Museological Claims to Autonomous Knowledge: Rethinking the Conceptual Mode of Display and its Claims to Knowledge	169
Assimina Kaniari and Georgios Giannakopoulos	
Use of Library Loan Records for Book Recommendation	172
Keita Tsuji, Erika Kuroo, Sho Sato, Ui Ikeuchi, Atsushi Ikeuchi, Fuyuki Yoshikane and Hiroshi Itsumura	
Developing a National Database on Librarianship and Information Science. The Case of E-VIVA, the Hellenic Fulltext Database	176

Preface: Proceedings of the International Conference on Integrated Information (IC-ININFO 2011)

GEORGIOS A. GIANNAKOPOULOS

Department of Library Science and Information Systems, Technological Educational Institute of Athens, Aghiou Spyridonos, Egaleo, 12210, Greece

DAMIANOS P. SAKAS

Department of Computer and Technology Science, University of Peloponnese, Praxitelous 89-91, Piraeus, 18532, Greece

Aims and Scope of the Conference

The International Conference on Integrated Information 2011 took place in Kos Island, Greece, between September, 29 and October, 3, 2011. IC-ININFO is an international interdisciplinary conference covering research and development in the field of information management and integration.

The conference aims at creating a forum for further discussion for an Integrated Information Field incorporating a series of issues and/or related organizations that manage information in their everyday operations. Therefore, the call for papers is addressed to scholars and/ or professionals of the fields of Library and Archives Science (including digital libraries and electronic archives), Museum and Gallery Studies, Information Science, Documentation, Information Management, Records Management, Knowledge Management, Data management and Copyright experts the latter with an emphasis on Electronic Publications. Furthermore, papers focusing on issues of Cultural Heritage Management and Conservation Management are also be welcomed along with papers regarding the Management of Nonprofit Organizations such as libraries, archives and museums.

One of the primary objectives of the IC-ININFO will be the investigation of information-based managerial change in organizations. Driven by the fast-paced advances in the Information field, this change is characterized in terms of its impact on organizations that manage information in their everyday operations.

Grouping emerging technologies in the Information field together in a close examination of practices, problems and trends, IC-ININFO and its emphases on integration and management will present the state of the art in the field. Addressed jointly to the academic and practitioner, it will provide a forum for a number of perspectives based on either theoretical analyses or empirical case studies that will foster dialogue and exchange of ideas.

Topics of general Interest

Library Science, Archives Science, Museum and Gallery Studies, Information Science, Documentation, Digital Libraries, Electronic Archives, Information Management, Records / Document Management, Knowledge Management, Data Management, Copyright, Electronic Publications, Cultural Heritage Management, Conservation Management, Management of Nonprofit Organizations, History of Information, History of Collections, Health Information

Symposia

The Conference offered a number of sessions under its patronage, providing a concise overview of the most current issues and hands-on experience in information-related fields.

- Symposium on Integrated information: Theory, Policies, Tools
- 4th Symposium on Business and Management and Dynamic Simulation Models supporting management strategies

- Session on Open Access Repositories: Self-archiving, Metadata, Content policies, Usage
- Session on Evidence-Based Information in Clinical Practice
- Session on Business Management and Communication Strategies supporting Decision Making Process in Tourism Sector
- Session on Electronic Publishing: A Developing Landscape
- Session on Information and Knowledge Management
- Session on Information Content Preservation as Outcome of Conservation of Cultural Heritage: Ethics, Methodology and Tools
- Session on Advances Information for Strategic Management
- Session on Information History: Perspectives, Methods and Current Topics
- Session on Divergence and Convergence: Information Work in Digital Cultural Memory Institutions
- Session on Contemporary issues in Management: Organisational Behaviour, Information Technology, Education & Hospital leadership.

The wide range of aspects that the sessions covered, highlighted future trends in the Information Science.

Paper Peer Review

More than 300 papers had been submitted for consideration in IC-ININFO 2011. From them, 91 were selected for presentation, after peer review in a double blind review process. The accepted papers were presented at IC-ININFO 2011.

Thanks

We would like to thank all members that participated in any way in the IC-ININFO 2011 Conference and especially:

- The famous publishing house Emerald for its communication sponsorship.
- The co-organizing Universities and Institutes for their support and development of a high-quality Conference scientific level and profile.
- The members of the Scientific Committee that honored the Conference with their presence and provided a significant contribution to the review of papers as well as for their indications for the improvement of the Conference.
- All members of the Organizing Committee for their help, support and spirit participation before, during and after the Conference.
- The Session Organizers for their willing to organize sessions of high importance and for their editorial work, contributing in the development of valued services to the Conference.
- PhDC Marina Terzi for her excellent editorial work, contributing in the production of the Conference proceedings.

CONFERENCE DETAILS

Chairs

Georgios A. Giannakopoulos, Technological Educational Institute of Athens, Greece
Damianos P. Sakas, University of Peloponnese, Greece

Co-Chairs

Daphne Kyriaki – Manesi, Technological Educational Institute of Athens, Greece
Dimitrios Vlachos, University of Peloponnese, Greece

Scientific Committee

Amanda Spink, Queensland University of Technology
Andreas Bagias, European Court
Andreas Rauber, Vienna University of Technology
Astrid van Wesenbeeck, SPARC Europe
Christine Urquhart, Aberystwyth University
Christos Schizas, University of Cyprus
Christos Skourlas, Technological Educational Institute of Athens
Claire Farago, University of Colorado at Boulder
Claus-Peter Klas, FernUniversität in Hagen
Costas Vassilakis, University of Peloponnese,
Dimitris Dervos, Technological Educational Institute of Thessaloniki
Eelco Ferwerda, OAPEN
Elena Garcia Barriocanal, University of Alcalá
Emmanuel Garoufallou, Technological Educational Institute of Thessaloniki
Filippos Tsimpoglou, University of Cyprus
Fillia Makedon, University of Texas at Arlington
George Korres, University of Newcastle
Georgios Evangelidis, University of Macedonia
Georgios Panagiaris, Technological Educational Institute of Athens
Johan Oomen, Netherlands Institute for Sound and Vision
José Aldana, University of Malaga
Konstantinos Masselos, University of Peloponnese
Luciana Duranti, The University of British Columbia
Markos N. Dendrinis, Technological Institute of Athens
Milena Dobрева, University of Strathclyde
Prodromos Tsiavos, London School of Economics and Political Science
Sándor Darányi, University of Borås
Sarantos Kapidakis, Ionian University
Sirje Virkus, Tallinn University
Spiros Zervos, Technological Educational Institute of Athens
Susan Myburgh, University of South Australia
Theodoros Pitsios, University of Athens, Faculty of Medicine

Organizing Committee

Alexandros Koulouris (Chair), Technological Educational Institute of Athens
Christos Christopoulos, SCEV Scientific Events Ltd
Marina Terzi, University of the Aegean, Greece
Evangelia Markaki, Aristotle University of Thessaloniki

Assimina Kaniari, Athens School of Fine Arts
Evangelia Lappa, General Hospital Attikis K.A.T.
Dimitris Kouis, Greek Ministry of Education, Lifelong Learning and Religious Affairs
Dionysis Kokkinos, National Technical University of Athens

KEYNOTE SPEAKER

Professor Amanda Spink

Professor Amanda Spink has published over 340 scholarly journal articles, refereed conference papers and book chapters, and 6 books. Many of her journal articles are published in the *Journal of the American Society for Information Science and Technology*, *Information Processing and Management*, and the *Journal of Documentation*. She is Editor of the Emerald journal *Aslib Proceedings*. Amanda's research has been published at many conferences including ASIST, IEEE ITCC, CAIS, Internet Computing, ACM SIGIR, and ISIC Conferences. Her recent books include *Information Behavior: An Evolutionary Instinct* and *Web Search: Multidisciplinary Perspectives*, both published by Springer. Amanda's research focuses on theoretical and empirical studies of information behavior, including the evolutionary and developmental foundations. The National Science Foundation, the American Library Association, Andrew R. Mellon Foundation, Amazon.com, Vivisimo. Com, Infospace.com, NEC, IBM, Excite.com, AlltheWeb.com, AltaVista.com, FAST, and Lockheed Martin have sponsored her research. In 2008 Professor Spink had the second highest H-index citation score in her field from 1998 to 2008 [Norris, M. (2008)]. Ranking Fellow Scholars and their H-Index: Preliminary Survey Results. Loughborough University, Dept of Information Science Report].

Information and Secrecy on the Silk Road. Methods of Encryption of Legal Documents in Inner Asia (3th-4th century)

Szabolcs Felföldi

*University of Szeged. Department of Archaeology, 6722, Szeged, Hungary.
Felfoldi.Szabolcs(at)antiqu.u-szeged.hu*

Abstract: *The aim of this paper is to provide an overview of studies concerning the linkage between the very complex system of the great Inner Asian Silk Road and the history of information. In an era where literacy was acquiring larger and larger importance beside the verbal information transmitting methods, the “filtering” (that is, privacy management) techniques became especially important, whose purpose was to keep the information inside a defined circle by the encryption or coding of written documents. Hence this paper covers not just general problems of transmitting information along the Silk Road, but also deals with the special methods of encryption or coding of Kharosthi documents. These legal documents can shed light on everyday life of the Silk Road during the 3th-4th centuries, and they help us understand processes of administration, diplomacy and information techniques of that era.*

Keywords: *Silk road, Methods of encryption, Legal documents, Seals, Aurel Stein*

I. INTRODUCTION

The examination of the complex phenomenon of information has cut out a significant slice of the space of scientific disciplines covered by the larger fields of information technology, economics, etc. The examination of the history of information in itself has become such a broad research area that we can almost consider it as an independent discipline. Questions like the history of the flow of information, which examines/examined the speed, the intensity and the topology, etc., of information, dispose of literature sufficient to fill a whole library. The thorough investigation of the most important trade routes of world-history raises some really exciting questions of information topology. While until the last decades of the twentieth century these trade routes had been regarded primarily as the movers of the circulation of the economy, or the scenes of the spread of culture, religion, and artistic trends, today more and more are drawing our attention to a more complex role of the network of such routes. The spread of information and innovation would have been much slower and complicated without the network in all certainty. Thus, these commercial systems functioned not only as a cache and generator (not to a small extent contributing to the ever accelerating pace of the growth of the common human knowledge, which now is almost advancing at the speed of light), but due to certain counter-mechanisms they operated as an information

filter, as well. The examination of these “filters” is an especially exciting, though almost undiscovered research area.

II. SILK ROAD AND INFORMATION

A certain piece of information, an innovation, an invention ensuring positional or strategic advantage to its owner meant such value (as it does today, too) that motivated its proprietor to make serious efforts to preserve it. Thus, two basic factors clashed on these routes: to use a modern simile, the first was the free and flexible handling of information in a basically open source coded commercial system, and the other was the efforts to preserve and keep information secret. To illustrate this thought with a specific example: the functioning of the large commercial system discussed in my presentation, the Silk Road, which connected China to Rome and then to Byzantium on one hand, served China's economic and political interests, on the other hand the secret of silk making becoming public was all the time considered as a serious loss to be avoided, so they tried to delay its happening as long as possible. Consequently, China tried to keep secret the way of silk manufacturing not only by legal, but also by administrative and military means. This worked so well that nothing was known about the nature of silk in the ancient Mediterranean before the arrival of the first cocoon in Byzantium. The people of the time had silk in their hands, they often took it apart into threads, but they could not exactly say what this great fabric was made of (Höllmann, 2004).

Thus, in this case we can speak about a kind of guided information filtering. At the same time there were filters in the system that did not inevitably work due to state or “upper” will, what is more, in certain cases we can question intentionality in connection to them, nevertheless, these filters served the real or presumed economic, political, etc., interests of some states, social classes and communities well. The length of certain trade routes, the number of intermediaries or intermediary languages involved in the process of trade could be such factors in themselves. Each one of these factors could contribute to the slowing down, to the distortion, or God forbid, to the complete blocking of information. Because of the above factors it was clearly known already in the 19th century that, theoretically, the most valuable sources along the Silk Road are those which have a relatively small number of the intermediaries mentioned, thus the information goes through relatively few filters (Elisseeff, 2000). Exactly that is why Marco Polo's travelogues were regarded

among the most important medieval sources for a long time. The author had travelled all along the Silk Road to China, according to earlier theories, thus, his account is of first hand information, and the number of “filtering factors” is low in his book.

However, in his work, which has a new approach, a British China expert Frances Wood claims, opposing earlier theories, that Marco Polo’s book is a typical example for the effects of the filtering factors mentioned. As it turned out, Marco Polo uses the Central Asian and Chinese proper nouns distorted, in Persian transcription, most probably he did not speak Chinese. Furthermore, there are several items in the book the authenticity of which can be doubted – and not because of the characteristics of the medieval genre. In addition, there should be a number of other things in the book if Marco Polo had really been to China. In Wood’s final conclusion, Marco Polo had never been to China, and information reached him distorted and rarefied by many filters (Wood, 1995).

In an era where literacy was acquiring larger and larger importance beside the verbal information transmitting methods, the “filtering” (that is, privacy management) techniques became especially important, whose purpose was to keep the information inside a defined circle by the encryption or coding of written documents.

The wide range of encryption and coding is as old as information itself. The appearance of writing involved the appearance of sophisticated techniques of written encryption. Even in the cases of the earliest written records technologies obstructing the widespread of information were observed: closed envelopes, the use of seals, the coding of texts, or ciphers, all served the purpose of making information in the text available only for those whom it was destined to. Unfortunately, we know relatively little about these methods in the late antiquity due to the scarcity of archaeological material, consequently, findings providing information on the sophisticated methods of encryption from this period from the Central Asian section of the Silk Road are especially important.

III. METHODS OF ENCRYPTION OF LEGAL DOCUMENTS IN INNER ASIA

In his expedition to the Central Asian Silk Road the Hungarian–British archaeologist Aurel Stein discovered an ancient town in ruins in 1900, in the area of today’s China, at the edge of the Taklamakan Desert (Mirsky, 1977). Among the ruins of Cadota, a settlement flourishing in the third and fourth centuries AD, he unearthed hundreds of written documents. These documents, written with the so-called Kharosthi writing and preserved in an excellent state in the sand of the desert, depict an incredibly exciting picture of the social, economic and cultural relations of the age (Atwood, 1991). They shed excellent light on the earlier unknown history of the Central Asian expansion of the Indian culture, and they also provide an insight into the

everyday life of people once having lived there. The documents are especially important apart from their content, since their raw material, manufacturing, authentication, encryption technique make them unique documents on the chancellery practice of the age.

The majority of the documents were made of wood. (Few manuscripts written on leather were also found, but no paper or other materials were used to write on in Cadota.) The documents were created in an area where palm leaves, or birch bark could not be found, that is, there were no such raw materials which were widely used to write on in India and China at the time (Felföldi, 2005).

The “wooden papers”, obviously made in the place by local joiners, are special regarding their shape, as well. Basically they can be divided into two main groups: elongated, wedge-shaped pieces, and rectangular ones. In the case of these documents the criterion of “content in the form” is really valid, since the different shapes were used for different purpose. Official messages, legal documents and the most important contracts were written on rectangular wooden tablets, while data referring to court cases, shorter messages, short orders and instructions were written on wedge-shaped tablets. The exact and accurate naming of the tablet types also appear in the documents (Burrow, 1940).

Figure 1. Rectangular double tablets

Thus, without exception, these tablets have important information on them. To hide and keep information secret, an exceptionally elaborate and sophisticated method was used by the literate of Cadota. The wedge-shaped and rectangular wooden tablets each had two, perfectly fitting pieces. In the case of the wedge-shaped tablets the lower piece and the precisely fitting covering piece were carved out of one single piece with the use of a saw. In the cases of the elongated, rectangular documents the lower and the upper pieces were not exactly the same. The lower tablets were a little longer, and their shorter sides had two prominent edges, which served as a frame, ensuring the perfect slide of the smaller covering tablet into the lower tablet. The majority of the text was on the lower tablet. If there was not enough space for the text on the lower tablet, it continued on the interior side of the upper tablet, but well-hidden from unauthorized eyes in any case.

The text hidden in this way was made even less accessible by the use of special cording, and seals.

In the cases of the wedge-shaped double tablets a hole was drilled in the pointed end of the tablet through the lower and the upper piece, and then, in the wider end a rectangular shaped indentation was carved. The wood was thicker here than in the pointed end, and the edge of the indentation stood out of the plane of the tablet perceptibly.

Figure 2. Wedge-shaped tablets

After preparing the document the cover tablet was placed onto the lower tablet, and a cord was pulled through the hole drilled in the more pointed end, and in the end, the cord was strained towards the indentation in the wider end of the tablet. The edge of the indentation was scarified, helping to keep the cord stable, which was driven through the indentation several times, straight and diagonally, as well. The cord fixed in this way was strained, tied, and the indentation above it was filled with clay. The official seal of the sender, or of the person requesting the documents, was printed here.

The rectangular wooden tablets were not drilled through, only the closing cord was wound vertically and diagonally multiple times above the carving above the indentation made for the seal of these “letters”. Soft material was put on the cords, and seal was printed in it in this case, as well (Stein, 1907).

The seal prints found in Cadota could provide enough material for another, separate presentation, since they give an authentic evidence of the unique mixing of cultures along the Silk Road, of the intermingling of the Chinese, Indian, Persian, and ancient Greek and Roman civilizations. The seals of the documents that were found in the peripheries of China, written in Indian language and writing, although presenting more Central Asian character in their material, depict the Greek gods of Hellas of thousands of kilometres away, Eros or Pallas Athena, proving the cultural multi-colourness of the Silk Road in the third and fourth centuries.

Aurel Stein found several open, and seal-less documents on the site, but there were dozens of documents where the tablets, their cords, and their wonderful clay seals were intact. A large part of these double wooden tablets revealed their secrets only after

being cut in the British Museum, over 1600 years after being closed and sealed (Stein, 1921).

Obviously, this sophisticated system did not take shape in Cadota which had only prospered for a few decades in the turn of the third and fourth centuries, but another, mature and previously tested chancellery system was adapted to the local conditions. Thus, it is an important question where the excellent and complex system of encryption originated from out of the above mentioned cultures (Chinese, Indian, Iranian, ancient Greek and Roman civilizations). Unfortunately, the majority of the geographical conditions of the above mentioned great civilizations are such that do not make possible the survival of numbers of documents made of similar organic material. (No similar written document has been found in any of the above mentioned great civilizations.) The majority of the records written on perishable material have not survived, or have survived in very limited numbers in the normal climate of both India and the Mediterranean. In spite of this, there are certain signs that make it more or less possible to localize the birthplace of the technology. In one of his later expeditions Aurel Stein found the predecessors of these strange letter papers and envelopes in hundreds of years older excavation layers, much closer to the China in the strict sense, hundreds of kilometres to the east of Cadota, next to Dunhuang. So it seems highly probable that this encrypting and authentication method appeared more to the east, a few hundred years earlier, and it spread westward to become a definitive element of the chancellery practice of Cadota during the third and fourth centuries.

Thus, in lack of evidence, we cannot exclude completely the possibility that the birthplace of the complex, sophisticated technology was India or another region, nevertheless, the probability of the method’s arrival in the sand dunes of Taklamakan along the Silk Road from China is still higher.

And what secrets did these documents guard so carefully? Besides meticulously worded contracts on land purchase, or secret reports on the movements of Barbarians appearing at the frontiers, they contain information on all things that were important enough for a few people, or the local ruler, or his top rank officials to try to keep their content away from everyday readers as carefully as they, or their means could realize it.

IV. CONCLUSION

The image of another life has gained shape by today under the surface of life along the Silk Road (commerce, diplomacy, politics, etc.), where the acquisition and the hiding of information were in a fight of alternating success, sometimes deploying the devices of high politics, sometimes the simple devices of the chancellery of a small town. The stakes were obviously different, the means may have not.
