PROCESSING AND
MANAGEMENT

CONFERENCE ORGANIZERS INSTITUTES

The International Conference on Integrated Information is supported by the following Institutes:

Emerald Group Publishing Limited
Technological educational Institute of Athens, Greece
University of Peloponnese, Greece
National And Kapodistrian University of Athens, Greece
Mednet Hellas, The Greek Medical Network
2nd AMICUS Workshop

To learn more about I-DAS, including the Book Series, please visit the webpage

CONTENTS

PREFACE: Proceedings of the International Conference on Integrated Information (IC-INFO 2011)	1
Georgios A. Giannakopoulos, Damianos P. Sakas	
Conference Details	3
Keynote Speaker	5
SYMPOSIUM ON INFORMATION AND KNOWLEDGE MANAGEMENT	6
Prof. Christos Skourlas	
Towards the Preservation and Availability of Historical Books and Manuscripts: A Case Study	8
Eleni Galiotou	
An Extensive Experimental Study on the Cluster-based Reference set Reduction for Speeding-up the k-nn Classifier	12
Stefanos Ougiaroglou, Georgios Evangelidis and Dimitris A. Dervos	
Exploiting the Search Culture Modulated by the Documentation Retrieval Applications	16
Nikitas N. Karanikolas and Christos Skourlas	
Information and Knowledge Organization: The Case of the TEI of Athens	22
Anastasios Tsolakidis, Manolis Chalaris and Ioannis Chalaris	
Providing Access to Students with Disabilities and Learning Difficulties in Higher Education through a Secure Wireless framework	26
Catherine Marinagi and Christos Skourlas	
Improving Query Efficiency in High Dimensional Point Indexes	30
Evangelos Outsios and Georgios Evangelidis	
Text Segmentation Using Named Entity Recognition and co-Reference Resolution in Greek Texts	34
Pavlina Fragkou	
KINISIS, a Graphical XQuery Language	42
Euclid Keramopoulos, Achilleas Pliakas, Konstantinos Tsekos and Ignatios Deligiannis	
Dimensionality Curse, Concentration Phenomenon and the KDB-tree	46
Nikolaos Kouiroukidis and Georgios Evangelidi	

Applying Balanced Scorecard Strategic Management in Higher Education	50
Manolis Chalaris, Anastasios Tsolakidis and Ioannis Chalaris	
A Web Portal Model for NGOs' Knowledge Management	54
Zuhal Tanrikulu	
The Digital Archives System and Application Optimized for the Tradition Knowledge Archives	58
Jeon Hong. Chan, In Deok. Hwang, Jae Hak. Park, Hyeok. Sim, U won. Gwon and Soon Cheol. Park	
A Semi-automatic Emerging Technology Trend Classifier Using SCOPUS and PATSTAT	62
Seonho Kim, Woondong Yeo, Byong-Youl Coh, Waqas Rasheed, Jaewoo Kang	
Presenting a Framework for Knowledge Management within a Web Enabled Living Lab	66
Lizette de Jager and Albertus AK Buitendag and Potjie (JS) van der Walt	
4TH SYMPOSIUM ON BUSINESS AND MANAGEMENT AND DYNAMIC SIMULATION MODELS SUPPORTING MANAGEMENT STRATEGIES	71
Dr. Damianos Sakas	
New Political Communication Practices: No Budget Events Management. The New Challenge	73
Evangelia N. Markaki, Damianios P. Sakas and Theodore Chadjipantelis	
Free Software – Open Source Software. A Powerful Tool for Developing Creativity in the Hands of the Student	78
Nasiopoulos K. Dimitrios, Damianos P. Sakas, Konstantinos Masselos	
Open Source Web Applications. How it Spread Through the Internet and their Contribution to Education.	82
Nasiopoulos K. Dimitrios, Damianos P. Sakas, Konstantinos Masselos	
Culture in Modern Times in the Frame of Luhmann's System Theory	85
Anastasia J. Chournazidis	
Managing Scientific Journals: A Cultural Viewpoint	87
Marina C. Terzi, Damianos P. Sakas, and Ioannis Seimenis	
A Conceptual Framework for Analyzing Knowledge-based Entrepreneurship	92
Nikos S. Kanellos	

SESSION ON INFORMATION HISTORY: PERSPECTIVES, METHODS AND CURRENT TOPICS	96
Prof. Laszlo Karvalics	
Emerging Research Fields in Information History	98
Laszlo Z. Karvalics	
Information Management through Elementary Data Clusters: New Observations on Pridianum-Type Roman Statistical Documents	102
Gergő Gellérfi	
Information and Secrecy on the Silk Road. Methods of Encryption of Legal Documents in Inner Asia (3th-4th century)	106
Szabolcs Felföldi	
The Role of Information and Disinformation in the Establishment of the Mongolian Empire: A Re-examination of the 13th century Mongolian History from the Viewpoint of Information History	110
Márton Gergő Vér	
Early Warning Systems and the Hospitallers in the Eastern Mediterranean	114
Zsolt Hunyadi	
Information Management as Establishment Dutch Navigational Knowledge on Japan, 1608-1641	118

Preface: Proceedings of the International Conference on Integrated Information (IC-ININFO 2011)

GEORGIOS A. GIANNAKOPOULOS

Department of Library Science and Information Systems, Technological Educational Institute of Athens, Aghiou Spyridonos, Egaleo, 12210, Greece

DAMIANOS P. SAKAS

Department of Computer and Technology Science, University of Peloponnese, Praxitelous 89-91, Piraeus, 18532, Greece

Aims and Scope of the Conference

The International Conference on Integrated Information 2011 took place in Kos Island, Greece, between September, 29 and October, 3, 2011. IC-ININFO is an international interdisciplinary conference covering research and development in the field of information management and integration.

The conference aims at creating a forum for further discussion for an Integrated Information Field incorporating a series of issues and/or related organizations that manage information in their everyday operations. Therefore, the call for papers is addressed to scholars and/ or professionals of the fields of Library and Archives Science (including digital libraries and electronic archives), Museum and Gallery Studies, Information Science, Documentation, Information Management, Records Management, Knowledge Management, Data management and Copyright experts the latter with an emphasis on Electronic Publications. Furthermore, papers focusing on issues of Cultural Heritage Management and Conservation Management are also be welcomed along with papers regarding the Management of Nonprofit Organizations such as libraries, archives and museums.

One of the primary objectives of the IC-ININFO will be the investigation of information-based managerial change in organizations. Driven by the fast-paced advances in the Information field, this change is characterized in terms of its impact on organizations that manage information in their everyday operations.

Grouping emerging technologies in the Information field together in a close examination of practices, problems and trends, IC-ININFO and its emphases on integration and management will present the state of the art in the field. Addressed jointly to the academic and practitioner, it will provide a forum for a number of perspectives based on either theoretical analyses or empirical case studies that will foster dialogue and exchange of ideas.

Topics of general Interest

Library Science, Archives Science, Museum and Gallery Studies, Information Science, Documentation, Digital Libraries, Electronic Archives, Information Management, Records / Document Management, Knowledge Management, Data Management, Copyright, Electronic Publications, Cultural Heritage Management, Conservation Management, Management of Nonprofit Organizations, History of Information, History of Collections, Health Information

Symposia

The Conference offered a number of sessions under its patronage, providing a concise overview of the most current issues and hands-on experience in information-related fields.

- Symposium on Integrated information: Theory, Policies, Tools
- 4th Symposium on Business and Management and Dynamic Simulation Models supporting management strategies

- Session on Open Access Repositories: Self-archiving, Metadata, Content policies, Usage
- Session on Evidence-Based Information in Clinical Practice
- Session on Business Management and Communication Strategies supporting Decision Making Process in Tourism Sector
- Session on Electronic Publishing: A Developing Landscape
- Session on Information and Knowledge Management
- Session on Information Content Preservation as Outcome of Conservation of Cultural Heritage: Ethics, Methodology and Tools
- Session on Advances Information for Strategic Management
- Session on Information History: Perspectives, Methods and Current Topics
- Session on Divergence and Convergence: Information Work in Digital Cultural Memory Institutions
- Session on Contemporary issues in Management: Organisational Behaviour, Information Technology, Education & Hospital leadership.

The wide range of aspects that the sessions covered, highlighted future trends in the Information Science.

Paper Peer Review

More than 300 papers had been submitted for consideration in IC-ININFO 2011. From them, 91 were selected for presentation, after peer review in a double blind review process. The accepted papers were presented at IC-ININFO 2011.

Thanks

We would like to thank all members that participated in any way in the IC-ININFO 2011 Conference and especially:

- The famous publishing house Emerald for its communication sponsorship.
- The co-organizing Universities and Institutes for their support and development of a high-quality Conference scientific level and profile.
- The members of the Scientific Committee that honored the Conference with their presence and provided a significant contribution to the review of papers as well as for their indications for the improvement of the Conference.
- All members of the Organizing Committee for their help, support and spirit participation before, during and after the Conference.
- The Session Organizers for their willing to organize sessions of high importance and for their editorial work, contributing in the development of valued services to the Conference.
- PhDC Marina Terzi for her excellent editorial work, contributing in the production of the Conference proceedings.

CONFERENCE DETAILS

Chairs

Georgios A. Giannakopoulos, Technological Educational Institute of Athens, Greece
Damianos P. Sakas, University of Peloponnese, Greece

Co-Chairs

Daphne Kyriaki – Manesi, Technological Educational Institute of Athens, Greece
Dimitrios Vlachos, University of Peloponnese, Greece

Scientific Committee

Amanda Spink, Queensland University of Technology
Andreas Bagias, European Court
Andreas Rauber, Vienna University of Technology
Astrid van Wesenbeeck, SPARC Europe
Christine Urquhart, Aberystwyth University
Christos Schizas, University of Cyprus
Christos Skourlas, Technological Educational Institute of Athens
Claire Farago, University of Colorado at Boulder
Claus-Peter Klas, FernUniversität in Hagen
Costas Vassilakis, University of Peloponnese,
Dimitris Dervos, Technological Educational Institute of Thessaloniki
Eelco Ferwerda, OAPEN
Elena Garcia Barriocanal, University of Alcalá
Emmanuel Garoufallou, Technological Educational Institute of Thessaloniki
Filippos Tsimpoglou, University of Cyprus
Fillia Makedon, University of Texas at Arlington
George Korres, University of Newcastle
Georgios Evangelidis, University of Macedonia
Georgios Panagiaris, Technological Educational Institute of Athens
Johan Oomen, Netherlands Institute for Sound and Vision
José Aldana, University of Malaga
Konstantinos Masselos, University of Peloponnese
Luciana Duranti, The University of British Columbia
Markos N. Dendrinis, Technological Institute of Athens
Milena Dobрева, University of Strathclyde
Prodromos Tsiavos, London School of Economics and Political Science
Sándor Darányi, University of Borås
Sarantos Kapidakis, Ionian University
Sirje Virkus, Tallinn University
Spiros Zervos, Technological Educational Institute of Athens
Susan Myburgh, University of South Australia
Theodoros Pitsios, University of Athens, Faculty of Medicine

Organizing Committee

Alexandros Koulouris (Chair), Technological Educational Institute of Athens
Christos Christopoulos, SCEV Scientific Events Ltd
Marina Terzi, University of the Aegean, Greece
Evangelia Markaki, Aristotle University of Thessaloniki

Assimina Kaniari, Athens School of Fine Arts
Evangelia Lappa, General Hospital Attikis K.A.T.
Dimitris Kouis, Greek Ministry of Education, Lifelong Learning and Religious Affairs
Dionysis Kokkinos, National Technical University of Athens

KEYNOTE SPEAKER

Professor Amanda Spink

Professor Amanda Spink has published over 340 scholarly journal articles, refereed conference papers and book chapters, and 6 books. Many of her journal articles are published in the Journal of the American Society for Information Science and Technology, Information Processing and Management, and the Journal of Documentation. She is Editor of the Emerald journal Aslib Proceedings. Amanda's research has been published at many conferences including ASIST, IEEE ITCC, CAIS, Internet Computing, ACM SIGIR, and ISIC Conferences. Her recent books include Information Behavior: An Evolutionary Instinct and Web Search: Multidisciplinary Perspectives, both published by Springer. Amanda's research focuses on theoretical and empirical studies of information behavior, including the evolutionary and developmental foundations. The National Science Foundation, the American Library Association, Andrew R. Mellon Foundation, Amazon.com, Vivisimo. Com, Infospace.com, NEC, IBM, Excite.com, AlltheWeb.com, AltaVista.com, FAST, and Lockheed Martin have sponsored her research. In 2008 Professor Spink had the second highest H-index citation score in her field from 1998 to 2008 [Norris, M. (2008)]. Ranking Fellow Scholars and their H-Index: Preliminary Survey Results. Loughborough University, Dept of Information Science Report].

Files Everywhere - Register and Training of Men for Military and Civil Purpose in Prussia in the early 18th century

Marton Holczer

† University of Szeged, Institute of Germanistic, H-6722, Szeged, Hungary
holczer.marton(at)gmail.com

Abstract: *The first steps of the modern bureaucratic state promise many interesting aspects for the researcher of information management. The original function and the first proceeds of creating databases could perceive through historical observations. Furthermore, the Prussian history let us have a better insight, how peoples' lives could impact being registered by central authorities.*

Keywords: *Information history, Information integration, Early bureaucracy, Prussia, Absolutism.*

I. ABSOLUTE MONARCHY AND THE STANDING ARMY

Collecting and managing data counts as a foundation of the modern state but better understanding of the original functions and benefits of such efforts could be useful. The so-called absolutism in the early modern period created new fields of state intervention through conscious gathering of information. The bureaucracy was not born for itself or exclusively for the centralization of central power but for development of the state.

The administrative order based on collecting data and, on one hand, is useful to monitor the environment. On other hand, the available data act like a microscope, offer higher resolution than the naked eye. Making differences inside the previously as irresolvable regarded subjects make possible brand-new types of intervention through identification new elements of the subject.

The war commissars of the Prussian king, Frederick William I. discovered the common soldiers of the regiments and the common peasants of the country. And if they were discovered they could be controlled otherwise. For example their skills could be improve or they could be protected against local authorities. And the state got the chance to save the commoners who were able to produce valuable goods or pay relative big amount tax for the treasury

II. THE NEW CONSCRIPTING SYSTEM

A. Recruiting and supplying soldiers around 1700

The so-called absolutism in the early modern period created new fields of state intervention through gathering of information with the aim of having a stronger standing army than the other states. War commissariat (Kriegskommissariat) was the Trojan horse of centralized administration against the Estates of the realm in Prussia without having any elaborate vision about ideal bureaucracy. The finance and bureaucracy

of the army became the heart of the state because it's formal independence from the estates made such intervention with "soft" confrontations possible.

The General War Commissariat managed supplies, so served the unification and professionalization of the army in Prussia and in many other countries around 1700. The war commissars were responsible for feeding, weapons, munition, payment and the newly introduced uniforms. Recruiting of suitable crew remained the main weakness of professional armies at that time. The standing armies were loaded with adventurous or fleeing foreigners because recruiting residents caused many heavy conflicts. The aristocratic colonels (Regimentsinhaber, Regimentschef) tended to protect their own peasants but they forced other landlord's peasants into the service.

The Prussian army solved this problem under Frederick William I in some single administrative step. The General War Commissariat was replaced by the General Directory (Generaldirektorium) in 1723, and the commissars placed strictly under the control of officials appointed by the king. A Decade later, the king assigned the borders of specific supplying districts of the regiments in 1733. In that regions (cantons), the war commissar registered all young men of serving age. These file (Stammrolle) contained some information about physical and social status of the local young men. After this procedure the potential draftees were let home, and they were conscripted in fact, if they were needed.

Not all young men were enrolled, the officers found one of seven lads suitable. By law, their social status changed right away, namely, they were not subject of the ordinary civil jurisdiction led by local nobles but they were placed under the military jurisdiction from this moment on.

B. The "Enrollierung" and the benefits of the cantonal system

The cantonal system, as information gathering task, based upon the principle of universal conscription, the registration process was almost complete. Not all territory and settlement covered by the network of cantons by reason of an other basic principle of Frederick William. He wanted to beware and increase the revenue generating capacity of his land and the standing army could easily disrupt the economy. Towns and special social groups were exempted from service, for example artisans, peasants with own farms, wealthier city dweller (over 10000 taler property), the sons of clericals if they were studying theology. In fact,

the registration process was almost complete but not everyone was called up.

“...there was a tendency for the sons of landless rural labourers to serve while those of the prosperous peasants did not.” (Clark)

The enlisted young men had to completed a basic training, then they were let home. Free of war, they became reservists, a brand-new category at that time. They had to completed refresher training for 2 or 3 months each year. Leave of absence was an another innovative phenomenon in the history of standing armies, and it can not be imagined without the registration system.

The cantonal system has far-reaching social consequences. The social prestige of a man as the king's soldier increased, all reservists wore their uniforms in the church on Sundays, namely, it was required from the authorities but, it must be noticed, the reservists wore their uniforms full of pride, “it was not unknown for enlisted men to gather voluntarily in town and village squares in order to practice their drilling”. (Clark). The state came to life from the perspective of the common people of Prussia in that moment as they were registered from the perspective of the state, and wearing uniforms informed everybody about this change in social structure. The state and the king remained no more just a tax-requiring entity in the distance but something that offered carrier prospects and a piece of safety against the local landlords (Junkers) or patricians (in towns) for the poor men.

Prussia became stand-alone country in the sense that the young men knew from an early age, if they will enrolled in the future or not or how long and where must they serve. And military service did not became a simple burden but a protection against local nobles, moreover a chance for upward social mobility. It was considered highly important by the king that the veterans should get occupation after their period of service as teacher in elementary schools, as guardian of marketplace, as gatekeeper and as other civil servant. He facilitated learning of peasants with the aim having sergeants who can read, write and pay. By the way, no other army used in Europe so many written instructions (Ordonnanz) and so detailed regulations that Prussia at that time. The act of “Enrollierung” could be seen as a test of the basic skills as well.

Frederick William I used the military-service as a training instrument for the civil life as well. The barracks became places of early form of vocational education and provided chances for better farming and for doing handicraft at home. As in Frederick William's vision, the state of handy hands was born.

The king himself had a file with the name of all noblemen above 12 years as well. Almost all noble family had a member who served in the army in the 18th century. The cantonal registration of men and other independently created files laid the foundation of the future bureaucratic state: the enlisting was a huge step to the complete registration of people.

The enlisting system enabled develop the fourth largest army in Europe with some reverse, although Prussia ranked only the tenth and thirteenth in terms of territory and population. The regiments became, so to stay, immortals. The canton system heighened morale and cohesion. The regiments and the cantons as well were competing on the battlefields and in the trainings that heightened morale. The former huge numbers of desertation cases decreased rapidly after 1733. () It must be noticed on this point, the “Stammroll” enabled sanctioning the family of a deserted soldier.

The cantonal system due to its visible advantage were adapted by some other countries (Habsburg Empire, Hessen-Kassel) in a very short time.

III. CONCLUSION: SIGNIFICANCE OF “ENROLLING” IN INFORMATION HISTORY

One single data collecting process could have many consequences. The registration process was not centralized and standardized in modern sense of bureaucracy, so it did not enable sophisticated information management activities. These practical databases were not merged or synchronized into one or more central database but the data was refreshed by the regiment's commissars each year. The king supervised the completeness of the regiments many times, so this data gathering could be perceived as a competitive task of commissars with strong interest of all the members, the regiments, the noble officers, and, in part, the potential soldiers themselves.

From competing decentralized data-collecting opened the possibility of making a central database of the people. One step to a control revolution of the state – hundred years before the industrial revolution, this means the material needs of heavy industry, the speed and freight capacity of traffic and the great business adventure, made the control revolution necessary in according to Beniger. More data, more files mean more effective managing of organisations and more opportunity to control the processes from a central point.

The strongly supervised “Stammrolls” opened new perspectives of state-building. The Prussian commissars did not use any new medium in this process, moreover, this techniques didn't require printing itself, e.g. there were carried out census in Egypt more than 4300 years ago (Jacoby, 22). The encouraging impact for other states and for other administrative methods could be considered as the special relevance of the Prussian conscripting system. The affectation for files increased tremendous inside the Prussian state 18th.

There were so many files about issues and people everywhere in the Prussian administration, that many European traveller viewed Prussia as the greatest prison in the whole world because of the “ubiquitous” registration of all phenomenon. ()

Existing files about one phenomenon means existence the phenomenon from the administrations

view. The act of registration change the subject of the registration. One type of registered data means information from one special view with big blind spot.

Being observed and being registrated means that you could be controlled, led or manipulated from great distance more directly than as “unregistered”. Henry Jacoby observed the paradox relationship between bureaucracy and citizenship: more individual freedom from local community or local authority means bigger central administration. The first step had been done: to be registered. Building a real bureaucratic state needed more connection of information.
